

Cock-a-doodle Duet

Addition: two digits and three digits with regrouping

Instructions:

- Carefully tear out the "Cock-a-doodle Duet" file folder center from the back of the book. If desired, laminate the folder for durability.
- Carefully tear out page 41. Cut out the cards. If desired, laminate the cards for durability. Place the programmed cards in a zippered plastic bag. Copy the bag label at the bottom of this page. Tape it to the outside of the bag to help you easily identify the contents and the file folder center to which the bag belongs. (Program the blank cards and use them as replacements when needed. For additional reproducible blank cards, see page 31.)
- Make a class supply of the recording sheet on page 14.
- Use a clothespin or large paper clip to attach the bag to the folder. If desired, place the supply of recording sheets inside the folder.

Name _____

Recording Sheet

Cock-a-doodle Duet
Addition: two digits and three digits with regrouping

Copy each card's problem (without the answer) in its numbered box. Solve the problem.

| 9 | 10 | 11 | 12 |
| 13 | 14 | 15 | 16 |

Bag Label

Cock-a-doodle Duet

Addition: two digits and three digits with regrouping

To Adapt:

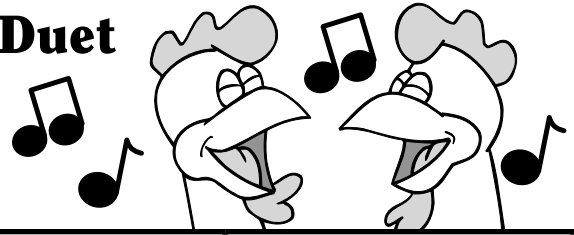

To simplify this activity, make a copy of the recording sheet on page 14. Change the skill line at the top of the page to reflect no regrouping; then make a class set of the page. Next, make four copies of the corresponding strip of blank cards on page 31. Cut out the cards. Program each card with a two- or three-digit addition problem with no regrouping (some with incorrect answers). Remember to program the back of each card with "Correct" or "Incorrect" and the answer. Have each student complete the activity as directed.
